EDUCATION

University of California, San Diego

B.S. in **Cognitive Science – Design & Interaction**, Minor in Computer Science

Oct 2020 - Dec 2024

La Jolla, CA

PROJECTS

Mise: Restaurant Dashboard

Product Designer

Aug 2026 - Sept 2026

Huntington Beach, CA

- Designed three connected surfaces of a multi-role restaurant operations tool (KDS, front-of-house order entry, POS + checkout), built on a five-layer design token system supporting light/dark mode and two device sizes
- Directed an AI-augmented design workflow using Claude-generated mockups and HTML artifacts as fast first drafts, and systematically reconciling them against the design system
- Enforced WCAG 2.1 AA as an accessibility floor throughout, with redundant color+icon/label encoding on status signals, 44px+ touch/focus targets, and contrast validated against actual rendered surfaces

Ravers Reaching Out

UX Researcher & Designer

January 2024 - March 2024

La Jolla, CA

- Iterated with paper piggyback prototyping, and conducted interviews and analyzed findings to design a mobile app that puts festival-goers into small groups for an on-site scavenger hunt.
- Designed and analyzed a 37-person survey on festival attendance, showing cost (84%) and having no one to go with (38%) were the top barriers, and 93% of ravers said a way to meet other attendees would help.

EXPERIENCE

Brain Builders

Lead Robotics and Game Design Instructor

Sept 2025 - Present

Tustin, CA

- Delivered hands-on STEM instruction to 100+ K–8 students across schools in Orange County, creating lesson plans across seven schools with challenges of progressing difficulty
- Mentored middle schoolers through capstone project, building original 2D game in MakeCode, then modeling 3D character from that game in Tinkercad, developing early programming and CAD fluency
- Coached elementary students through iterative design cycles to optimize faster Circuit Cube dual motor powered cars, testing gear ratio combinations and LEGO stacking configurations to

Huong Viet Restaurant

Freelance Website Developer

Aug 2024 - March 2025

Garden Grove, CA

- Led end-to-end development and deployment of responsive website, managing navigation flow, page structure, and mobile usability, while improving online visibility by 80% through SEO
- Authored content across four site pages with supporting visual assets, including photographing, editing, and compressing menu images to enhance readability and optimize page load performance
- Standardized images and descriptions for over 50 menu items across ToastTab and PDF formats, ensuring consistent numbering, prices, and descriptions between platforms

SKILLS

- Design & Research:** UX Research, Interaction Design, Wireframing & Prototyping, Accessibility (WCAG 2.1 AA), Design Tokens & Systems
- Development:** React Native, Python, Java, C, C++
